What changed in Accounting, and where you saw it.

AllNewCheck before upgrading

Bill line predictionNEW

A bill's product, account, tax and analytic distribution are suggested from past bills and the label.

▶ Move 3

Matching rules and auto reconciliationNEW

Rules set the payment tolerance and matching order; Run Auto Reconciliation reruns them on demand.

▶ Move 2

Payment statuses renamedCHANGED

A payment that was "In Process" now shows Paid, and one that was "Paid" now shows Reconciled, once it meets its bank line.

▶ Move 5

Bank entries come from the bankCHANGED

Every journal entry on a bank account must now come from a bank transaction, so manual mismatches cannot happen.

Invoice remindersNEW

Follow-ups from the invoice list or the Send button, or automatic reminders set in the Accounting settings.

▶ Move 4

No double paymentsNEW

The payment dialog finds payments already on their way and deducts them from the amount due.

▶ Move 5

Parent accountsCHANGED

Parent accounts replace account groups in the chart of accounts, and account codes become optional.

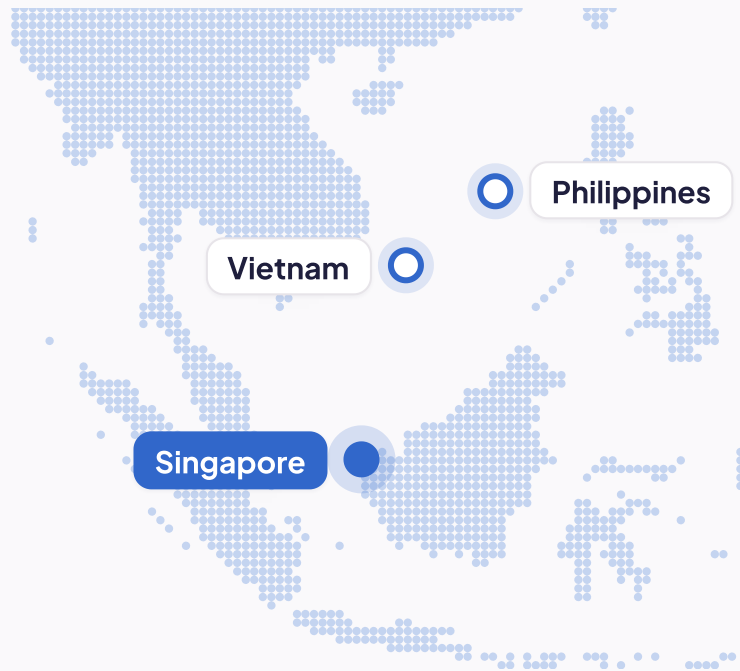

Expenses arrive as draft billsCHANGED

Approved expenses become draft bills in the expense journal; the separate Employee Expenses menu is gone.
