

a proposal for hitachi elevator philippines

Keep every lift moving, and prove it.

An Odoo 20 service core for breakdown calls, field visits, signed reports and installation projects, working beside GERP in Makati, Cebu and Cagayan de Oro.

 Odoo Ready Partner

Body cameras with QR worksite scanning for your field teams

🌐 Your news release, 22 November 2025

🔍 From your public pages only. Everything else in this deck is ours to confirm with you.

NSCR Phase 1

67 units · 7 stations

- Valenzuela
- Meycauayan
- Marilao
- Bocaue
- Balagtas
- Guiguinto
- Malolos

— CP01 · 13 elevators, 26 escalators
— CP02 · 8 elevators, 20 escalators

what we'd like to confirm

Five places where Odoo takes the load.

Q Hypotheses from public information, to test with you in discovery. Point at one to follow its line.

how it fits

A service layer beside GERP, not another ERP.

WAYS IN

Click any box. Odoo runs the service work; GERP keeps the books.

workflow · a breakdown call

From the first ring to the signed report.

Customer signature

 Report sent to the building admin

Your cameras stay

The body-camera programme keeps running. Each visit record keeps the clip ID, so footage and paperwork point at each other.

One report per visit

Checklist, photos, parts and the signature become a PDF for the building owner, on the day.

No signal in the machine room

Odoo 20 creates and edits records offline, and syncs them when the connection is back. Every unit keeps its visit history.

phase 2 · maintenance contracts

Renewals that raise their hand, 90 days out.

90 days

60 days

30 days

phase 2 · the renewal radar

Every contract ending this year, in one view.

Watched by hand

With the 90-day rule

Renewed
Quotation sent
Due, not contacted
Not due yet

Ending in the next 90 days

112

contracts

Quoted or renewed

112

every one of them

Due and not contacted

0

nothing waiting on a person

Q Sample data for twelve months of contract end dates. Point at a month for its numbers.

parts and stock · to confirm

Parts confirmed before the van leaves.

No reordering rule

Reordering rule on

#HD-2431 · Cebu

lift stopped · needs 2 brake linings

Transfer 2 from Makati

	Door rollers	Brake linings	Handrails	Control boards
Makati	9	4	2	3
Cebu	4	2	1	1
Cagayan de Oro	3	2	0	1

Odoo proposes a transfer of 2 from Makati, arriving tomorrow, instead of a 6-week order.

Door roller kits in Makati stock

26 weeks · reorder at 8, order up to 14, three weeks' lead time

Q To confirm in discovery: branch stock may already live in GERP. Sample stock, lead times and quantities.

installation projects

NSCR-scale installs, one plan to handover.

21 elevators
46 escalators
7 stations

CP01 · TAISEI-DMCI JV

Valenzuela station

One project stage with its delivery, installation, testing and handover tasks, and the drawings, test certificates and handover forms in Documents.

Q Stations, packages and unit counts from Hitachi's 2021 release; the schedule is an illustration.

phase 3 · what you could show every owner

The 24/7 promise, with a number on it.

All branches

Makati

Cebu

Cagayan de Oro

Response target met

96.4%

of 612 calls, last 90 days

Median time to site

24 min

P1 and P2 calls

Fixed on the first visit

87%

no second trip

Open tickets now

14

3 P1 · 5 P2 · 6 P3

Median time to site, by branch

minutes · target 30

Calls per week

last 12 weeks

Q Sample figures, to show the view. The real ones come from your first months on Odoo.

the scope

Ten apps, the service core first.

- 1 · Service core
- 2 · Contracts and sales
- 3 · Dashboards

Phase 1

Service core

Helpdesk
one queue for three branches, SLA clocks, customer portal

Planning
field service in Odoo 20: jobs, worksheets, live map

Sign
contracts, renewals and handover forms signed online

Documents
drawings, test certificates and visit reports

Project
installations stage by stage, NSCR-scale

STAYS WHERE IT IS

 **GERP**
the ledger, invoices and collections

 **Body cameras**
footage stays in your programme

 **Group systems**
governed by Hitachi

Phase 2

Contracts and sales

TO CONFIRM

Subscriptions
maintenance contracts, renewals, recurring invoices

Sales
multi-unit quotations, section by section

CRM
one pipeline for developers, owners and contractors

Purchase
planned orders with supplier lead times

🔍 Depends on how much GERP already covers, parts and stock included. We confirm it in discovery.

LINKS WE BUILD

 **GERP interface**
invoice lines out, payment status back

 **Camera clip IDs**
saved with each visit

Phase 3

Dashboards

Dashboards
SLA, visit and renewal views for managers and building owners

Built on Odoo 20. Odoo licences are billed by Odoo per user. Our work is quoted after discovery.

how we'd roll it out

A pilot in Makati, then Cebu and Cagayan de Oro.

Q An illustration in weeks. The plan and dates come out of discovery.

for the discovery workshop

Five questions that shape the scope.

1 What does GERP hold today: finance only, or contracts, orders, purchasing and stock too? ^

It decides phase 2: whether Odoo takes over a manual process or sits beside an existing one, and how much the interface carries.

2 Where do maintenance contracts and equipment records live now? ^

That is where the data migration starts: units, sites, contract dates and visit history.

3 Does Hitachi's remote monitoring run in the Philippines? ^

If alarms exist here, they can open tickets on their own, before anyone calls.

4 What response times do your contracts promise, by priority? ^

They become the SLA policies the clock runs against, per customer and per contract.

5 Where does body-camera footage go, and who reviews it? ^

So each visit record can point to its clip, and the review happens in one place.

AFTER DISCOVERY

- ✓ A fixed scope for phase 1, and a decision on phase 2
- ✓ A quotation for our work
- ✓ A pilot plan for Makati, with dates
- ✓ The GERP interface, agreed with group IT

next step

Let's follow one breakdown, end to end.

A half-day workshop in Makati: we map one breakdown call and one contract renewal on your real process, then show both running in Odoo 20.

 **Book the workshop**
