case study · food & beverage

Five outlets, one truth.

A Singapore F&B group with a central kitchen, five outlets and two delivery apps, whose numbers never agreed. The knot, and how Odoo 20 untied it.

meet the client

A busy group, running on patches.

Saltfern Kitchens
sample company · Singapore

1 central kitchen	**5** outlets, dine-in + takeaway	**140** menu items	**60** suppliers	**7** tools that don't talk

- **Three POS brands** — outlets 1–2, 3–4, 5
- **Delivery-app tablets** — two apps, two payouts
- **WhatsApp supplier orders** — one chat per supplier
- **Recipe costing in Excel** — last updated in March
- **Paper stock counts** — Sunday nights
- **Accounting software** — fed by an accountant, monthly
- **Rosters in a group chat** — swaps by message

TOOL 1 OF 7

Three POS brands across five outlets.

IT KNOWS	Each outlet's sales, by hour and by item.
IT CAN'T SEE	Stock, recipes, or what the other outlets sold.
SO EVERY WEEK	Z-reports are photographed and typed into a sheet.

✓ Illustrative composite · sample data

the complicated part

One price rise, found 38 days late.

→ follows the price rise

Day 0

Chicken thigh up 12%

The supplier says so in WhatsApp. Purchasing pays the new price.

Day 1

The batch costs more

Chicken rice sets now cost the kitchen S$0.21 more each. No one re-costs the recipe.

Day 1

Menu price stays

Five outlets on three POS brands. Nobody owns the price list.

Day 2

Delivery takes its cut

The commission is on the selling price, so the thinner margin shrinks further.

Day 30

Stock count “looks off”

Paper counts differ from Excel. Put down to waste.

Day 38

Month-end close

The accountant sees food cost jump from 30% to 33%. Why? Nobody can trace it.

UNSEEN MARGIN LOST

S$2,394

9,000 sets a month × S$0.21, sample

THE REAL PROBLEM

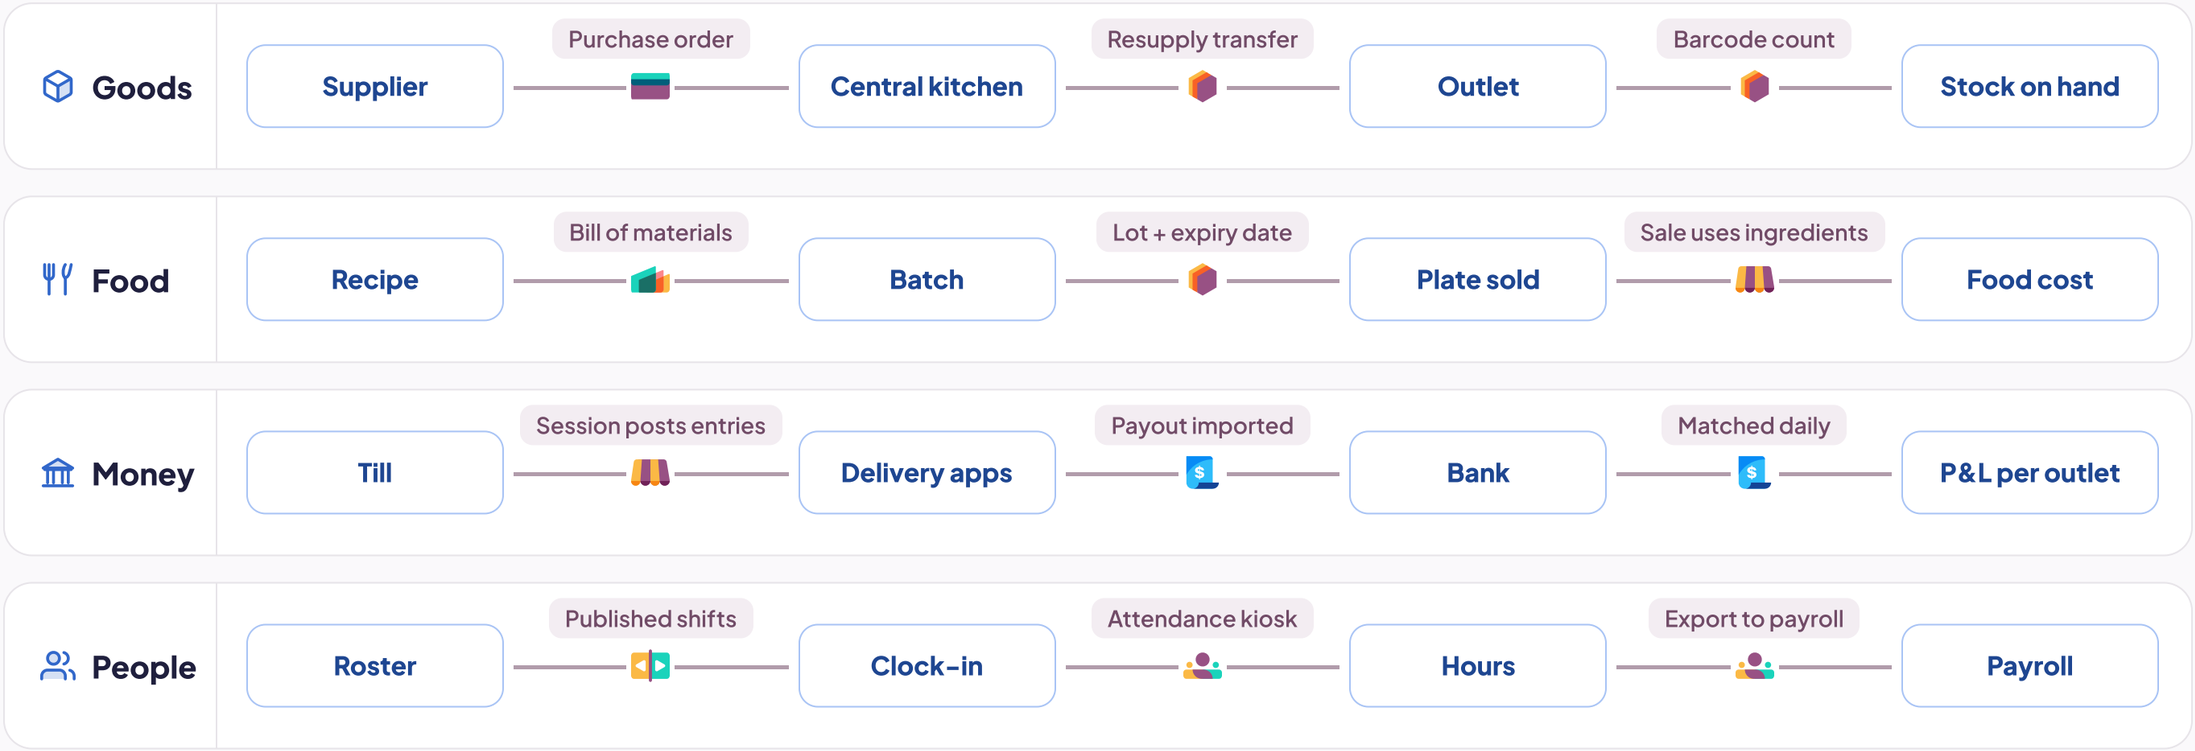

isn’t the price rise. It’s that the business found out **five weeks later**, and still can’t say which dish caused it.

✓ Sample figures

why it is hard

Four flows that never meet.

Before | With Odoo

12 hand-offs, one database. Each link becomes a document Odoo creates from the one before, so a price change reaches the plate on the same day.

the odoo answer

One database, nine apps, three places.

CENTRAL KITCHEN

- Manufacturing
- Inventory
- Quality

OUTLETS

- Point of Sale
- Restaurant
- Planning

BACK OFFICE

- Purchase
- Accounting
- Dashboards

Every app reads and writes **one database**: one product list, one price, one stock figure

CENTRAL KITCHEN

Manufacturing

Every recipe becomes a bill of materials, and every batch a manufacturing order. The cost of a dish is computed from its components, at today's prices.

REPLACES

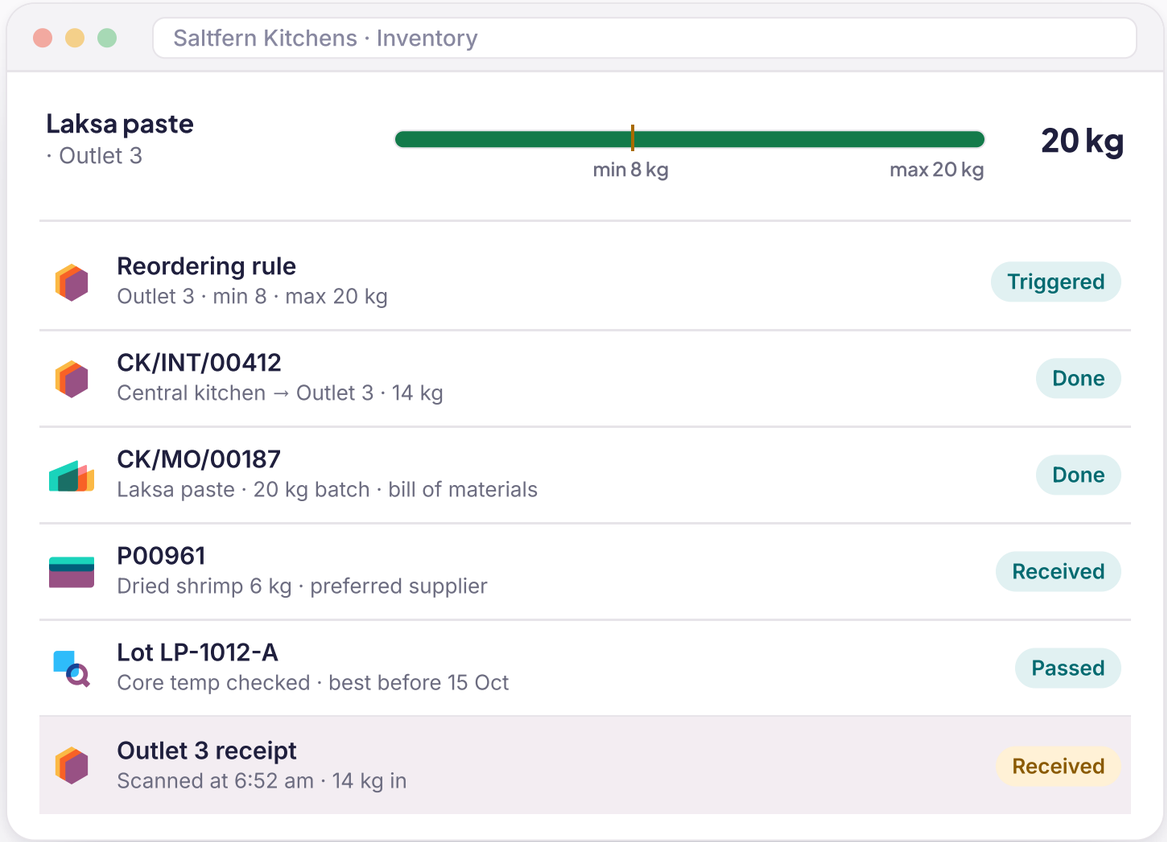

The recipe Excel last updated in March

workflow 1 · the goods

Low at 3 pm, restocked by 7 am.

Play the flow

1. **Outlet 3 drops below its minimum**
   Inventory · reordering rule
2. **A resupply transfer is created**
   Inventory · from the central kitchen
3. **The kitchen is short, so a batch is planned**
   Manufacturing · from the bill of materials
4. **One ingredient is short, so an RFQ is drafted**
   Purchase · the buyer approves
5. **Batch cooked, checked and labelled**
   Quality · lot and expiry date
6. **Van leaves, outlet scans it in**
   Inventory · received, stock updated

✓ Illustrative · sample data

Step 6 of 6 · nothing typed twice, nothing sent on WhatsApp

workflow 2 · the food and the money

Every plate, costed as it sells.

Dine-in | Delivery app

Manufacturing · Bill of materials

Chicken rice set

1 plate · kit

Component	Qty	Cost
Chicken thigh	180 g	S$1.45
Fragrant rice	200 g	S$0.42
Chilli-ginger sauce batch LP	40 g	S$0.26
Soup and greens	1	S$0.38
Plate and cutlery wash	1	S$0.05
Cost per plate		**S$2.56**

Chicken thigh from the supplier **S$8.06/kg**

SELLS AT
S$7.80
menu price, before GST

FOOD COST
32.8%
target 32%

MARGIN PER PLATE
S$5.24
after food cost

⚠ **Above target, flagged today.** Not at month-end: re-price, re-portion or switch supplier.

Order at table 12 → Kitchen Display → Components deducted → Food cost by dish

✓ Illustrative · sample prices and commission

how we rolled it out

Four phases, one pilot outlet first.

1 Foundation
Inventory · Purchase · Accounting

2 Central kitchen
Manufacturing · Quality

3 Pilot outlet, then four more
Point of Sale · Restaurant

4 People and insight
Planning · Dashboards

WE DO

Clean the product, supplier and recipe lists, set up six warehouses and the chart of accounts, and connect the bank. Everything else reads these.

~~Supplier prices in WhatsApp~~	→ Purchase orders with today's price
~~Books typed in monthly~~	→ Bank matched daily
