TechNext

case study · retail & ecommerce

One customer, every counter.

A Singapore homeware brand with five stores, a website and two marketplaces. Its shoppers move between all of them; its systems didn't. How Odoo 20 runs both businesses as one.

01 The problem | 02 The Odoo answer | 03 Rollout

meet the client

One customer, five strangers.

Harrowmere Living
sample company · Singapore

5 stores	**1** website, ships to SG & MY	**2** marketplaces	**860** products	**6** systems, none linked

Sample customer

one month, as she lived it

Her month | Your systems

Day 1	Day 3	Day 3	Day 9	Day 18	Day 22	Day 26
Browses the website saves the dinner set	**Buys it in Katong** S$128 at the till	**Earns points** shows the app at the counter	**Orders 4 mugs online** can't use her points	**11.11 on Shopee** a second set, as a gift	**Returns a mug in Bishan** bought online	**Asks for 40 sets** corporate gifts, by email
Web shop	Store till	Loyalty app	Web shop	Seller centre	Till · cash slip	Someone's inbox

WHO THE BUSINESS THINKS SHE IS

- **Web shop** a guest, then an account
- **Store tills** no customer on the sale
- **Loyalty app** a phone number
- **Shopee** a masked buyer name
- **Email + Excel** a lead, if someone logs it

Day 26 · asks for 40 sets

Corporate gifts for her company, by email to a store. A lead worth more than the year she has had, logged only if someone remembers.

the complicated part

Paid online, sold at the till.

→ plays one Saturday in Katong

WEBSITE SAYS

Kiln stoneware dinner set

16 pieces · S$128.00

Katong · in stock **0**

from last night's stock file, **23:00 Friday**

WEB-4471
collect in Katong · paid

WEB-4486
collect in Katong · paid

KATONG SHELF

0

really there

KATONG TILL SAYS

Dinner set · on hand ?

the till sells, it doesn't count

KAT-0912
walk-in · 2 sets · a wedding gift

BSH-cash
Bishan · S$18 refunded from the drawer

PAID, NOTHING TO COLLECT

2

customers

REFUNDED BY HAND

S$274.00

outside the books

SYSTEMS THAT SAW IT ALL

0

of six

10:04 Collect order · 11:40 Till sells 2 · 14:15 Second order · 17:30 Empty shelf · Day 4 The return

Day 4. She returns an online mug in Bishan. The till can't find the order, so **S$18 comes out of the drawer** on a slip.

✓ Sample figures

why it is hard

Five seams between two businesses.

× Store + web, separate | One Odoo

Stock

Every store's stock, live, on the product page.

Customer

One contact and one loyalty card, in store and online.

Price

One promotion, dated, on the till and the site.

Returns

The store finds the web order and books the return.

Money

Every session, payment and payout in one set of books.

One product, one customer, one stock figure and one ledger: the seams disappear because there is **nothing to join**.

the odoo answer

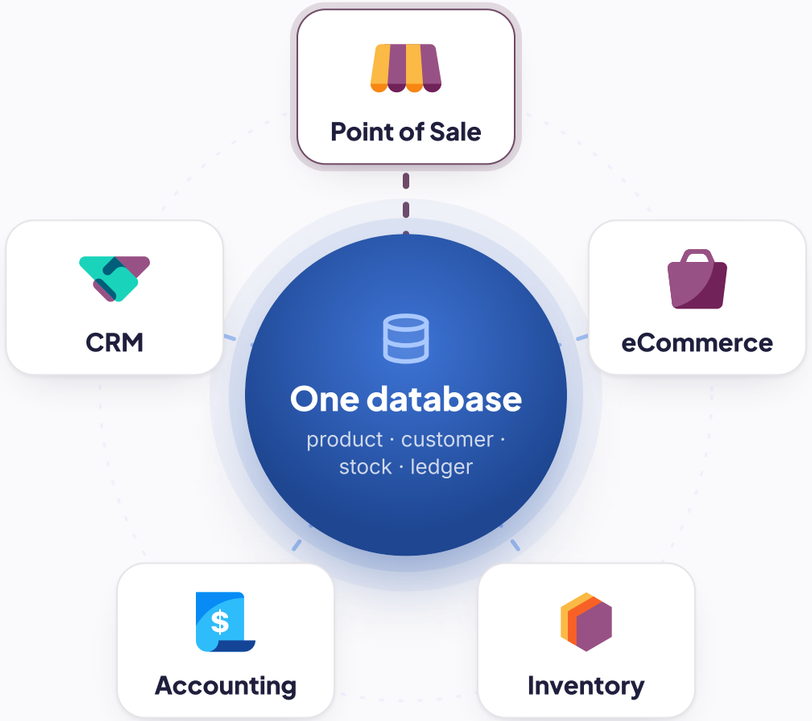

Five apps, one database.

5 stores
one till each

Website
SG & MY delivery, click & collect

Shopee · Lazada
Odoo connectors

Corporate buyers
gifting, bulk orders

POINT OF SALE

A till per store, one product list

Five shops on the same products, prices and promotions. Each sale takes stock from that store, sets the customer for points, and the till can load a website order for collection.

CLOSES THE SEAM

Price · Returns

REPLACES

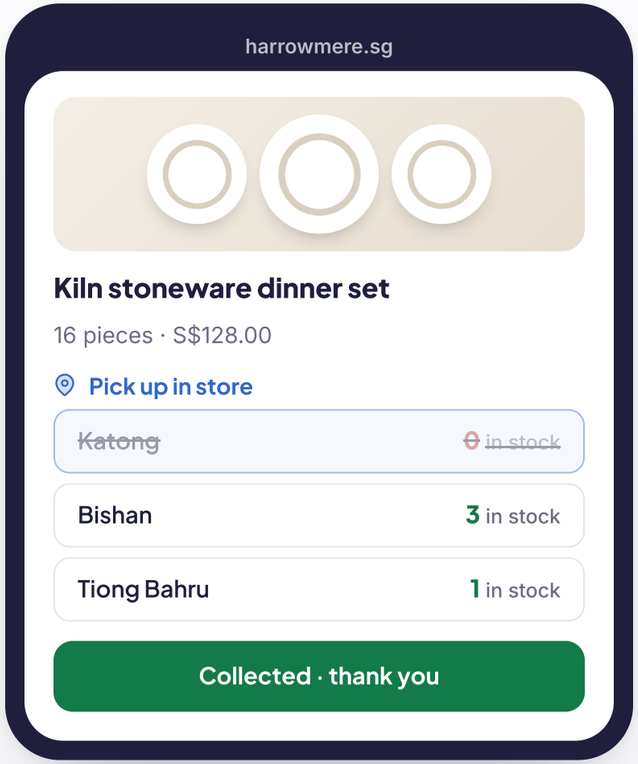

Five stand-alone tills and a loyalty app

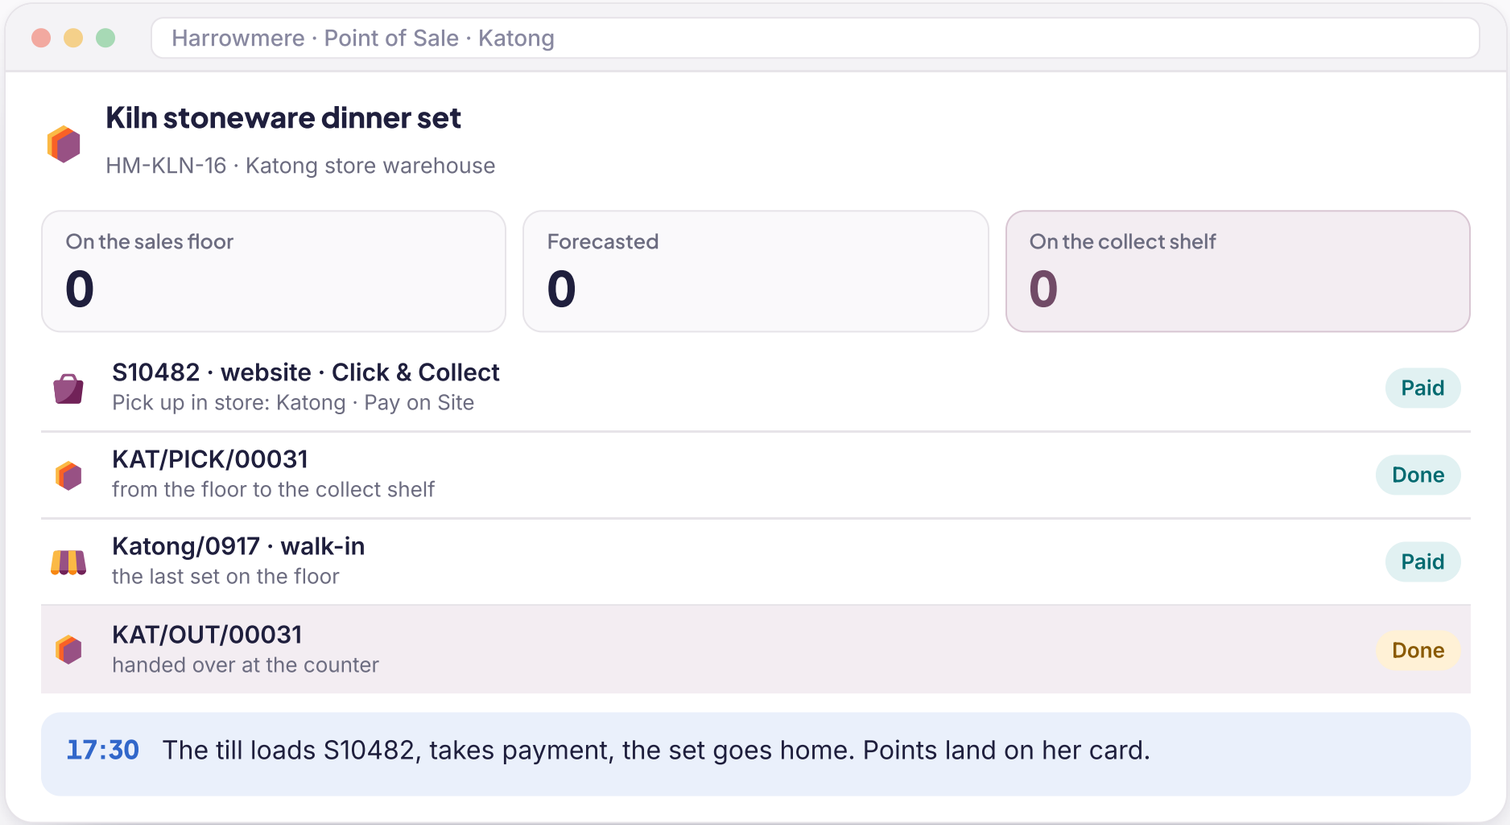

ALSO ON THE SAME DATABASE Sales · Purchase · Email Marketing · Dashboards

workflow 1 · the stock

Reserved online, held in Katong.

1 Browse · 2 Order · 3 Put aside · 4 Till sale · 5 Collect

✓ Illustrative · sample data

workflow 2 · the customer

Earned in Katong, spent online, sold to her company.

Sample customer · member

Contacts · one record for every channel

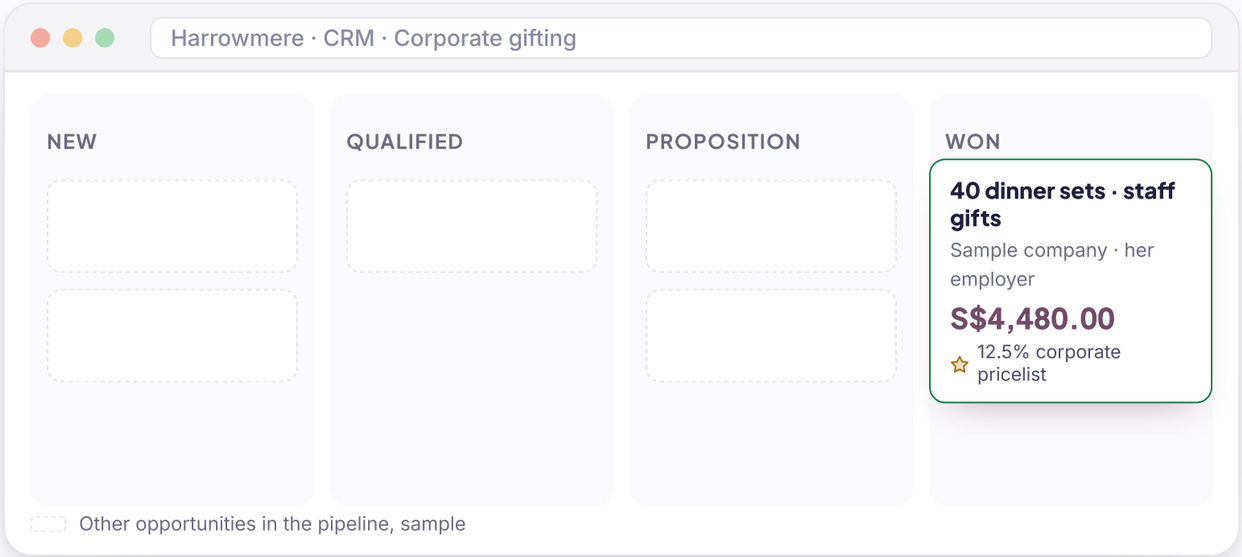

1	2	142	1
PoS orders	Sales	Loyalty points	Opportunities

Katong till · dinner set
customer set at the till · +128 points — **S$128.00**

Website · 4 mugs
200 points = S$10 off at checkout · +62 points — **S$62.00**

Website form · corporate gifts
a lead, with her history attached — **Lead**

Quotation from the opportunity
40 dinner sets · corporate pricelist — **Won**

1 Katong, day 3
The cashier sets the customer. +128 points on one card.

2 Website, day 9
Same card at checkout: 200 points off the mugs.

3 Website form, day 26
Her enquiry lands in CRM as a lead.

4 Won, day 31
The quotation goes out from the opportunity.

✓ Illustrative · sample customer, programme and pricing

workflow 3 · the money

Every channel closes into one set of books.

→ closes a Saturday

SATURDAY 14 NOV · TAKINGS BY CHANNEL

5 store sessions closed — S$18,420.00
cash, card, PayNow · one entry per store

Website payments — S$6,380.00
matched to the provider's payout

Shopee · Lazada — S$5,390.00
settlement report into a clearing account

In Accounting, by channel **S$30,190.00**

One report shows what each channel really earns.

Kiln dinner set · what one sale keeps, by channel

price S$128.00 · cost S$46.00 · before rent and staff

Marketplace commission and fees 18%

Visible only once all four close **into one ledger**, on the same product cost.

✓ Illustrative · sample takings and fees, not any provider's actual rates

how we rolled it out

Four phases, one stock from day one.

1 **One product list, one stock**
Inventory · Purchase · Accounting

2 **Stores on Point of Sale**
pilot store, then four · loyalty

3 **The website on the same stock**
eCommerce · Click & Collect

4 **Customers and marketplaces**
CRM · Email Marketing · connectors

WE DO

Load the 860 products with barcodes, set up the warehouse and five store warehouses, count once, and connect purchasing and the bank to the books.

~~A nightly stock file~~ → One stock figure per store

~~Six product lists~~ → One product, one barcode
