Six workflows, one Odoo.

Everything we agreed since August, as the workflows we will build and the nine modules that carry them. Standard Odoo Online: no custom code, no third-party apps.

01 The scope

02 Six workflows

03 Modules

04 Next steps

 Odoo Ready Partner

 Implementation scope · October 2026

 or click to begin ·  all slides

the promise this rests on

Standard Odoo, nothing bolted on.

Every workflow in this scope is native configuration. That keeps your running cost at the Odoo subscription, and answers the lock-in question.

 ~~Custom modules~~
none

 ~~Third-party apps~~
none

 ~~Scripts and code~~
none

 **Configuration**
by TechNext, one-off

 **Odoo Online**
per-user subscription, from Odoo

CLICK A LAYER

Two layers, nothing on top.

Odoo runs and upgrades the system.
We configure it once, with screens you can open and change yourself.

RECURRING

The Odoo subscription
per user, from Odoo

ONE-OFF

in the quotation

CODE UPKEEP

None to carry
there is none

 OUT OF THIS SCOPE

Capturing a Zoom meeting link

Zoom needs an outbound call that Odoo Online can't make from inside the database. A separate TechNext developer builds it as a webhook to an external service.

✓ Until then, appointment types use **Odoo's own video link**. Nothing Zoom-related sits in your database.

what it has to carry

Seven kinds of work, one client record.

01 TRE™ certifications and cohorts
Ticket · the big one

02 Workshops and introductory events
Ticket · free or paid

03 1:1 sessions and prepaid packages
Booking · the clinical work

04 Supervision for certified providers
Booking · never sold

05 Third-party programme work
Booking · no ticket changes hands

06 Retreats and a small webshop
Ticket and shop · e-book, journal

07 Later: eLearning and memberships
Phase two

 Sold as a ticket

TRE™ certifications and cohorts

The big ticket, run across several countries. The 2027 campaign is the hard deadline: the webshop must be production-ready for the October–November push.

 Singapore

 Bucharest, Romania

the six workflows

Six workflows, nine modules.

Click a module to light its workflows, or a workflow to open it.
Payments and Calendar run under all six.

WORKFLOW	 Website + eCommerce	 Events	 Appointments	 Sales	 Invoicing & Accounting	 CRM	 Sign	 Surveys	 Email Marketing
1 Public event or cohort ticket payment is the trigger									
2 Paid 1:1 session screened once, then pay to book									
3 Free booking, no ticket a request you approve									
4 Screened sale cleared first, then sold									
5 Waitlist and full events names keep coming									
6 Money and books matched and reconciled									

workflow 1 · payment is the trigger

Pay once, and the rest runs itself.

9 / 9 ▶ Play the flow

- 1 Client browses the event page
Website + Events
- 2 Answers registration and health-screening questions
Events
- 3 Adds the ticket, and anything else, to one basket
eCommerce
- 4 Pays by card, surcharge added, or by bank transfer
Payments
- 5 Invoice raised and sent automatically
Invoicing
- 6 Confirmation and info pack go out
Events · mail scheduler
- 7 Seat count and calendar update themselves
Events
- 8 Reminders fire 7 days and 1 day before
Events · mail scheduler
- 9 Buyer becomes a tagged contact, answers attached

CRM

✓ Illustrative · sample data

workflow 2 · a paid 1:1 session

Screened once, then frictionless.

6 / 6

▶ Play the flow

THE FIRST TIME A CLIENT COMES THROUGH

- 1 The site's one "Book a session" button opens the screening questionnaire
Website + Surveys
- 2 Scored at once against your red-flag criteria
Surveys · required score
- 3 Pass: emailed the paid booking link. Fail: the free Discovery Call
Automation rule + email
- 4 They pick a date and time
Appointments
- 5 They pay before the slot confirms
Pay-to-book + Payments

6 Invoice raised, calendar updated, reminder scheduled
Invoicing + Appointments

🔄 Every booking after that

Their booking link → "Anything changed?" → Pay → Confirmed

One short "anything changed since last time?" question. The questionnaire is re-issued every year, or whenever you want to re-screen.

SAMPLE ANSWERS

No red flags

A red flag

why the questionnaire comes first

Screen at the front door, not after the money.

Odoo will happily combine pay-to-book with manual approval. But that order takes the money first, and only then lets you decline.

● Pay to book, then approve the order we avoid

● Questionnaire first the way we build it

 **The record your lawyer asked about**
Every screening is kept with its pass or fail and the time it was scored.

 **The paid booking link is never put on the website**
For a new client, the questionnaire is the only way in.

workflow 3 · a free booking, no ticket

Booked, never sold.

✓ Built and tested

6 / 6

▶ Play the flow

- 1 You send the booking link directly to the person
 Appointments
- 2 Client answers one intake question
 Appointments
- 3 The booking arrives as a request, not a confirmation
 Auto-confirm off
- 4 You review and approve it
 Appointments
- 5 Meeting lands on your calendar, synced to Google
 Calendar
- 6 No payment, no invoice: nothing is sold
 Nothing to invoice

Supervision

Prepaid package

workflow 4 · a screened sale

Cleared first, then sold.

7 / 7

► Play the flow

- 1 You send an invite-only screening questionnaire
 Surveys
- 2 Pass or fail, scored against your criteria
 Surveys · required score
- 3 The service is not on the webshop at all
 eCommerce · unpublished
- 4 If cleared, you issue a quotation
 Sales
- 5 Client signs the waiver, the consent and the order
 Sign + Sales
- 6 Client pays online
 Sales + Payments
- 7 Order confirmed, invoice raised
 Invoicing

SAMPLE ANSWERS

All clearA contraindication

**Screening questionnaire**
Invite only · scored

Scored

Required score

92% Cleared: above the required score

 **On the webshop:** not listed. There is no public buy button.

**Quotation**
sample service

**Waiver · consent · order**
signed online

**Paid online**
card or transfer

**Invoice**
order confirmed

✓ Illustrative · sample data · switch the answers

how the screening holds

The gate is the missing buy button.

Odoo will never read a questionnaire and then decide whether to allow a checkout. It will happily refuse to sell something that was never put on the shop.

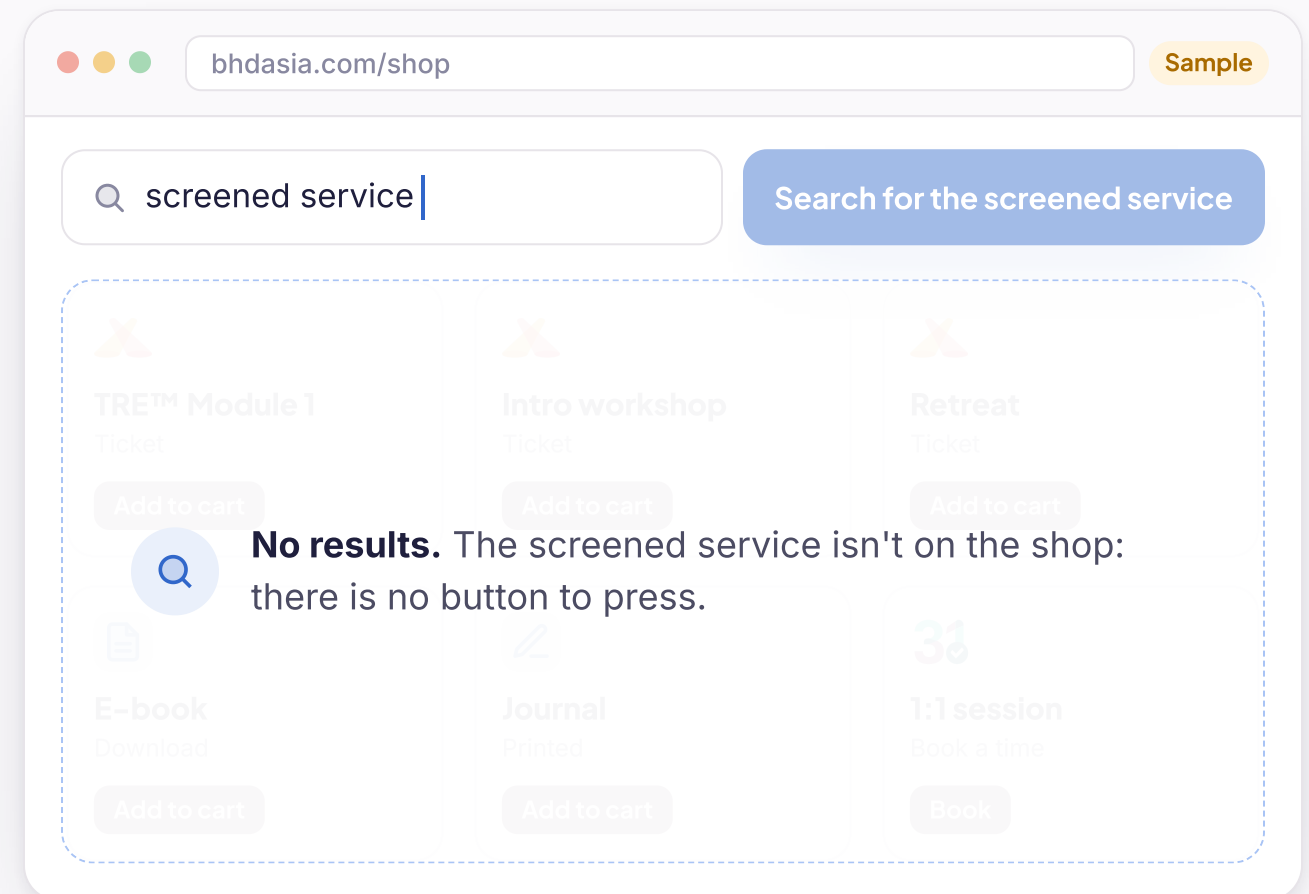

Refused after payment

Money taken, then refunded. Logic that has to be right every time.

Simply unavailable

Nothing to buy until you issue a quotation. The stronger legal position.

workflow 5 · waitlist and full events

A full event keeps collecting names.

4 / 4

▶ Play the flow

1 The event reaches its seat cap and closes itself

 Events

2 A free "join the waitlist" ticket or an interest form keeps capturing names

 Events / Website form

3 Those contacts are tagged

 CRM

4 A campaign invites them to the next cohort

 Email Marketing

modules at go-live

Nine modules, one subscription.

What it carries

What it replaces

Website + eCommerce

Your brand site, shop, event pages, one checkout for everything

Events

Cohorts and workshops, tiered tickets, seat caps, screening questions, QR check-in, reminders

Appointments

1:1 sessions, supervision, packages, third-party bookings; pay-to-book; Google sync

Sales

Quotations for the screened flow, signed and paid online

Invoicing & Accounting

Singapore localisation, multi-currency, automatic invoicing, reconciliation, accountant access

CRM

Enquiries become leads; every buyer becomes a tagged contact

Sign

Waivers and informed consent, e-signed and filed to the client record

Surveys

The screening gate, with automatic pass or fail scoring

Email Marketing

Reminders, waitlist nurture, cohort campaigns

All nine in the same per-user Odoo subscription: **no per-app licence**, and **no Odoo fee on the tickets you sell**. The licence comes from Odoo; TechNext quotes the implementation.

phase two

Switches, not projects.

Each one is a module in the same database, turned on when you need it.

☐

eLearning
 Your recorded teaching library, and bonus content for the Simba certification

☐

Documents
 Replaces the per-student Google Drive folders

☐

Subscriptions
 TRE™ Singapore memberships, if that entity forms

☐

Knowledge
 Your own playbook and SOPs

☐

Multi-company
 Only if a second entity becomes active

 YOUR ODOO DATABASE
 9 modules on

Dashed: ready to switch on, same database, same records.

already decided and tested

Settled, and shown working.

✓ Built

Free booking links

Supervision, prepaid and third-party types, each arriving as a request you approve. Your single biggest ask.

[Workflow 3 →](#)

✓ Verified live

Screening is native

An invite-only survey, automatic pass or fail, the product kept off the webshop, the sale by quotation.

[Workflow 2 →](#)

[Workflow 4 →](#)

✓ Decided

Payments

Card with the surcharge added on top, bank transfer kept fee-free alongside, PayPal for the UK school programmes.

[Workflow 6 →](#)

✓ Decided

Invoicing on payment

The invoice is raised automatically when the client pays, and the info pack rides on the confirmation email.

[Workflow 1 →](#)

✓ Settled 6 Oct

Books in SGD

The Singapore chart of accounts, with quotes in USD, EUR, GBP or JPY through their own pricelists.

[Currency →](#)

⚠ Good to know

Booking links are public once published

Odoo has no hidden, link-only booking page. What protects a booking:

✗ ~~A secret URL~~

✓ Your approval step

✓ A product never published

settled on 6 october

Books in SGD, prices in any currency.

BHD Asia is the Singapore-registered company, so the books are kept in Singapore dollars on the Singapore chart of accounts.

-  **USD, EUR, GBP and JPY** are active, each with its own selectable pricelist: a Bucharest cohort is quoted in euros, a UK programme in pounds.
-  It must not change once invoicing starts: **Odoo refuses to change a company's currency** while journal entries exist. We hit exactly that on a demo database.
